ECLIPSE

Inspired by the powerful duality of the sun and moon, the pieces of the ECLIPSE collection embody the beauty of opposites; the duality of dark and light, mystery and revelation. The sun and moon rarely meet, always chasing each other, but once their bodies finally unite, the whole world stares in awe of their eclipse.

Imagination was sparked by these two celestial beings and their relationship with the Earth. Each design of the "ECLIPSE collection draws inspiration from the powerful duality of the sun and moon and the mysterious unknown of the cosmos. For this collection we have pushed the boundaries. Exploring different tactilities, shapes and textures combined with a thoughtful color palette has led to the revelation of ECLIPSE.

"When I start designing a new collection, I always start by looking within. What are sources of inspiration that spark my passion and imagination. For this collection I was inspired by the duality of dark and light."

REIMAGINING SILHOUETTES

Step into a world where contrasts converge, and familiar forms are reimagined to inspire new perspectives. This collection explores the interplay of structure and fluidity, strength and softness—celebrating the art of duality in design. At the heart of this vision lies a sleek faux-leather jacket, accented with bold asymmetric zipper details, embodying modern edge and refined craftsmanship. Paired with a structured, multi-layered A-line skirt infused with crinoline, it creates a striking silhouette with dramatic depth and commanding presence. In contrast, the same jacket styled with a playful three-layered mini skirt evokes lightness and elegance, offering a softer expression of the same powerful aesthetic. This collection invites you to explore versatility, empowering you to redefine your wardrobe with pieces that are equal parts bold and sophisticated.
